

216C.416 SOLAR THERMAL REBATES.

Subdivision 1. **Rebate program created.** The commissioner of commerce shall operate a program to provide rebates for the installation of "Made in Minnesota" solar thermal systems in the state. "Solar thermal system" means a flat plate or evacuated tube that meets the requirements of section 216C.25 with a fixed orientation that collects the sun's radiant energy and transfers it to a storage medium for distribution as energy to heat or cool air or water. A solar thermal system is "Made in Minnesota" if components of the system are manufactured in Minnesota and the solar thermal system is certified by the Solar Rating and Certification Corporation. The solar thermal system may be installed in residential and commercial facilities for, among other purposes, hot water, space heating, or pool heating purposes.

Subd. 2. **Account; funding.** (a) The solar thermal system rebate account is created as a separate account in the special revenue fund in the state treasury. Earnings, such as interest, dividends, and any other earnings arising from account assets, must be credited to the account. Funds in the account are appropriated to the commissioner of commerce for the purpose of making the rebate payments under this section and administering this section.

(b) Beginning January 1, 2014, and each January 1 thereafter to January 1, 2023, the commissioner of commerce shall annually transfer \$250,000 from the account created in section 216C.412 for deposit in the account created in this subdivision.

(c) To the extent there are sufficient applications, the commissioner shall annually spend for rebates under this section from 2014 to 2023, for a total of ten years, approximately \$250,000 per year. If sufficient applications are not received to spend the money available for rebates in a year under this section, the unspent money must be returned to the account from which it was transferred, provided that funds available for 2014 applications shall remain available for 2015 applications.

Subd. 3. **Individual incentives.** The maximum rebate for a single family residential dwelling installation is the lesser of 25 percent of the installed cost of a complete system or \$2,500. The maximum rebate for a multiple family residential dwelling installation is the lesser of 25 percent of the installed cost of a complete system or \$5,000. The maximum rebate for a commercial installation is the lesser of 25 percent of the installation cost of the complete system or \$25,000. The system must be installed by a factory authorized installer. The commissioner shall allocate approximately 50 percent of the rebates in each year to solar thermal hot water and 50 percent to solar thermal air projects if sufficient applications are made for each.

Subd. 4. **Application process.** Applications for incentives must be made to the commissioner of commerce on forms provided by the commissioner. The commissioner shall use a random process for the selection of recipients of incentives except to the extent necessary to allocate rebates as required by this section.
